

MEISER GRP-Flooring systems

Discover universal applicability

MEISER

MEISER GRP-Flooring systems

MEISER GRP-Gratings (glass-fibre reinforced plastic gratings) are specially made for use in industrial and public areas in which corrosion resistance is of particular importance. Developed for universal use, they are easily and quickly installed and have a high load tolerance, thus ensuring great safety and comfortable walking.

MEISER GRP-Flooring systems are:

- economical
- very durable
- non-slip
- heavy duty
- resistant to smoke and fire
- insulating
- available in many colours
- easily installed
- maintenance-free and long-lived
- electrically non-conductive

MEISER offers a comprehensive range of GRP-Floor system products suitable for virtually any use including:

- platforms
- stages
- stairs
- covers
- fences
- protective grids
- facades

MEISER GRP-Flooring systems are available in various matrix systems to suit every use:

- IPR standard
polyester resin
for universal use
- VER exclus
vinyl ester resin
for extrem resistance to chemicals
- PHR exclus fire
phenolic resin
for maximum fire resistance

Information on our range is always available from our MEISER GRP team of experts. Mr. Alexander Meixner will be happy to answer any queries you may have and, of course, to draft a non-binding offer tailored to your needs.
